

Collaboration is at the heart of everything that NEPO does

Our procurement solutions are the result of consultation with the public sector, suppliers and end users, so that we deliver positive outcomes for the communities we serve.

Our portfolio of over 70 solutions is available for use by any public sector body across the UK via our free associate membership scheme.

We are the public sector

Our procurement solutions are designed by the public sector, for the public sector.

NEPO is a collaborative partnership of the twelve North East local authorities, we listen and consult with colleagues within procurement teams, and across service areas, to ensure that our portfolio of construction solutions meet their needs.

As a member of the National Association of Construction Frameworks and the LGA Construction Category Board, NEPO is committed to driving best practice and continuous improvement within the construction market.

NEPO's solutions are available for use by any public sector organisation including local authorities, NHS trusts, transport authorities, schools, colleges and universities.

“NEPO's construction solutions are focussed on delivering the best outcomes for our members and the communities we serve.

This means that we work closely with suppliers and contractors to embed social value in our procurement solutions so that we deliver benefits beyond the building site and support lasting improvements within local economies.”
