

Open

The e-procurement solution developed and managed by NEPO and the twelve North East Member Authorities.

analyse procure manage

WHAT IS OPEN?

Open is the one-stop-shop e-procurement solution that will replace all procurement systems and tools used by NEPO and the twelve North East Member Authorities.

Open will be designed and managed entirely on user needs and effective procurement data management, taking advantage of advanced and emerging technologies such as Artificial Intelligence and Robotic Process Automation.

The twelve North East Member Authorities are:

Open will automate the end-to-end procurement lifecycle, and Open's cloud technology will ensure total flexibility, scalability and portability.

Nicola Shelley
Managing Director at NEPO

WHAT WILL OPEN DO?

The listed procurement functions will be automated and managed by Open.

It's important to note that NEPO has not designed Open to be modular, but rather all-encompassing and seamless. Each procurement function will be intrinsically linked to the other to ensure efficiencies at every step and a golden thread of data without any break in the chain.

Function

Activities

Pre-Procurement

strategy development, market research, market engagement, stakeholder engagement

Procurement

scoping, tender development, publication, evaluation, award

Contract Management

engagement, performance monitoring, risk management, rebate management, social value, continuous improvement

Supplier Registration

sign-up, profile building, database, engagement, tendering

Data Analytics

collection, cleansing, enriching, dashboard, visualisation

WHAT ISSUES WILL OPEN ADDRESS?

NEPO and the NEPO Member Authorities' core objective is to improve operations for public sector buyers and suppliers, by developing a future-proofed solution, with full control of the management and development of that solution.

Examples of common issues that motivated this ambitious project:

- Need for more **intuitive interface** with supplier communities
- Ineffective or inaccessible **data**
- Lack of available external intelligence to ensure **fully informed decision-making**
- Disproportionate use of time and effort without **full automation**
- Recognition of opportunities for **greater efficiency** and removal of duplication

WHAT ARE THE OBJECTIVES OF OPEN?

NEPO and NEPO Member Authorities want to achieve the following through the development of Open:

01

Develop an entirely **fit for purpose and future-proof** e-procurement solution capable of delivering against rapidly changing technologies and innovations

02

Create a vehicle for positive **operational and behavioural change** through efficiencies and automation

03

Create a seamless and intuitive solution to interface with supply chains and **minimise administrative burden** of tendering for public sector opportunities

04

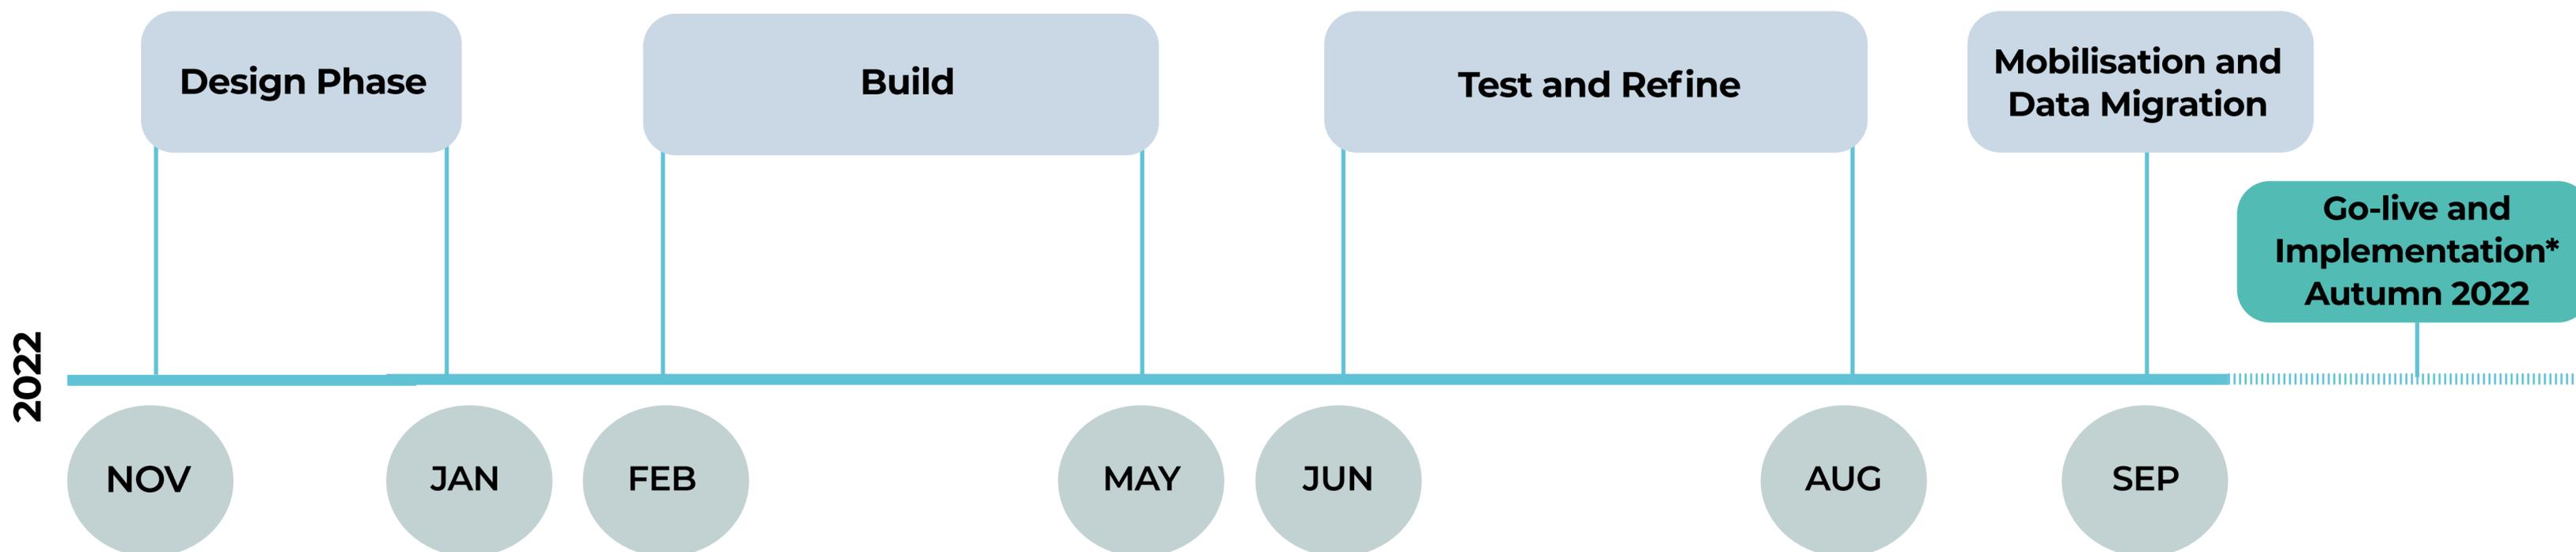

Maintain an ethos of **'by the public sector, for the public sector'** by ensuring full control, management and continuous development by NEPO and NEPO Member Authorities

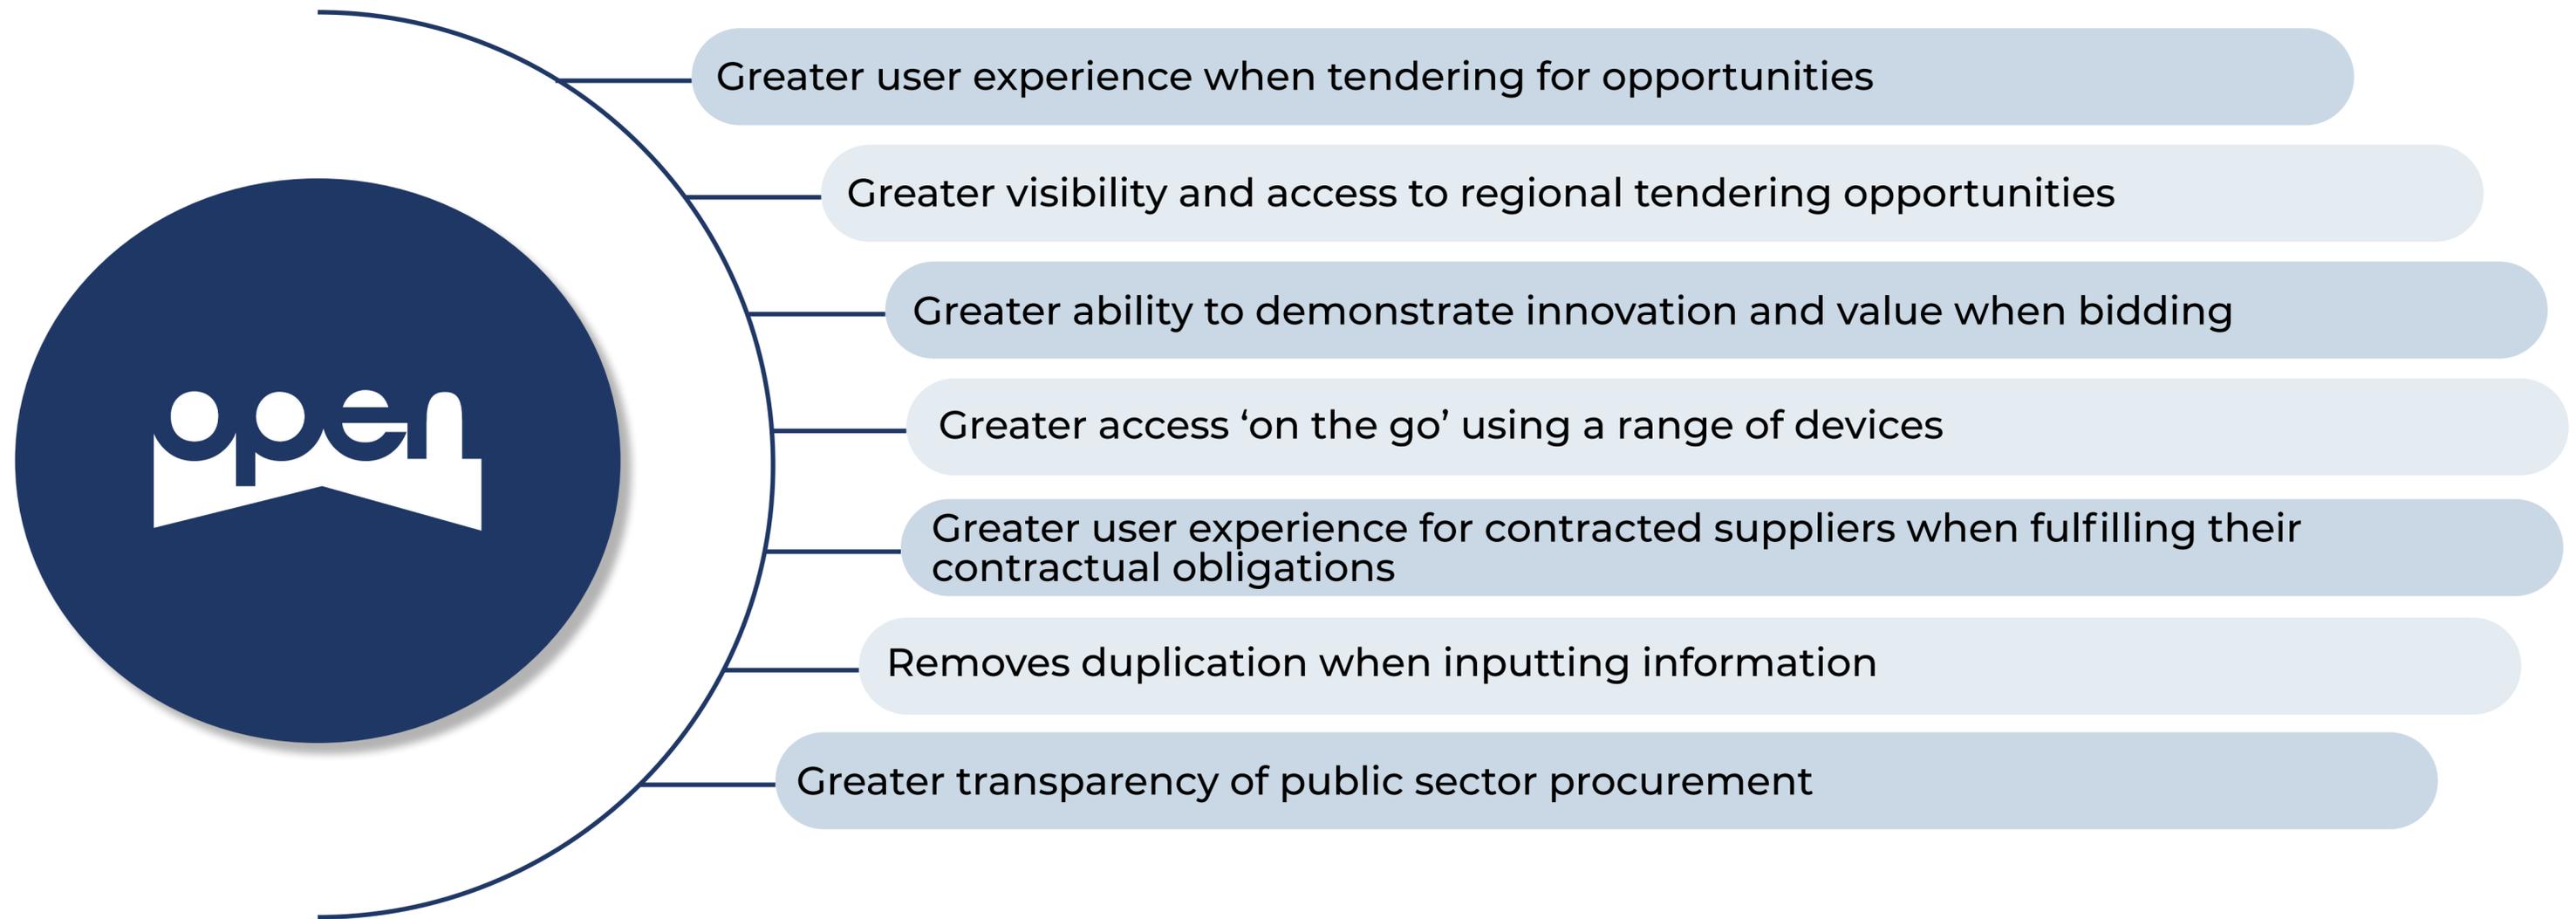

WHEN WILL OPEN BE READY?

Dates are indicative and subject to change

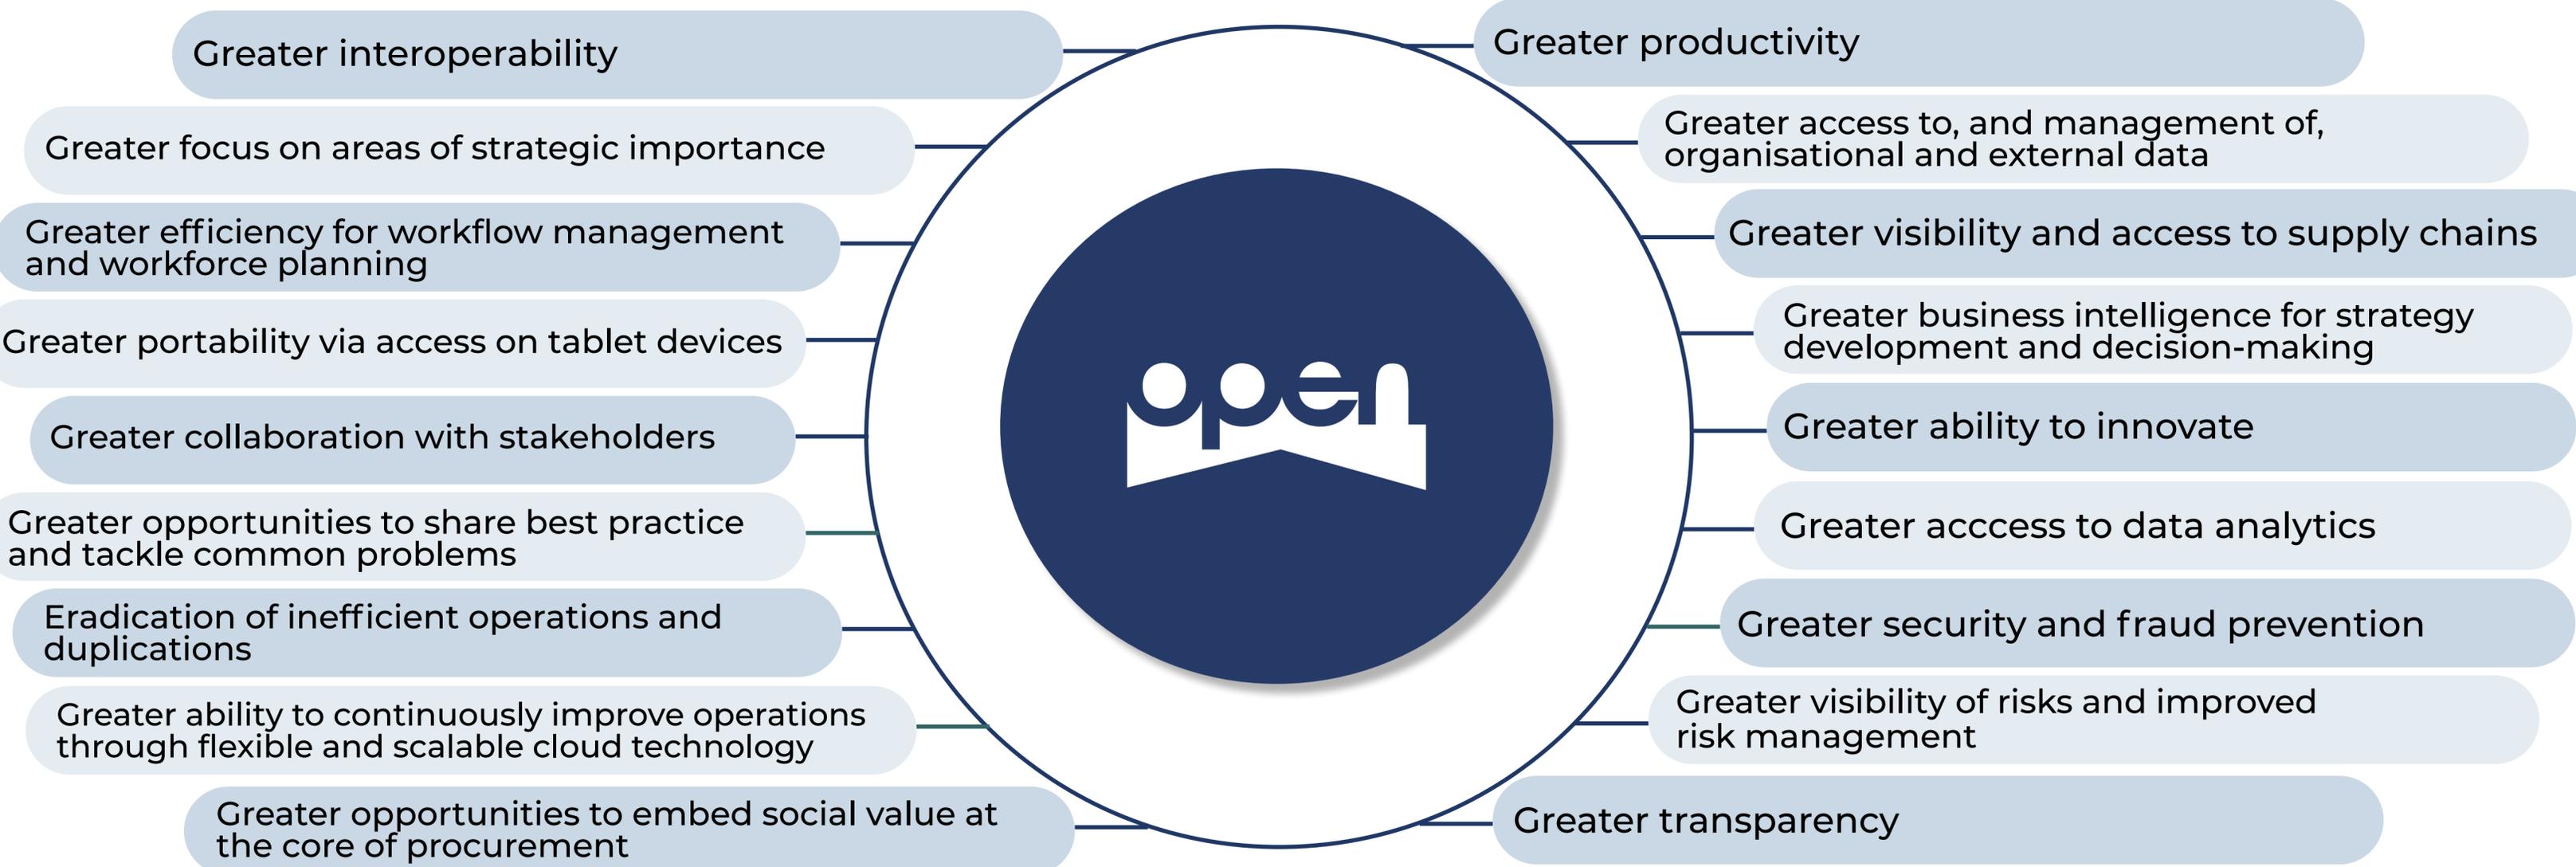

*Please note that it is anticipated that implementation across NEPO and NEPO Member Authorities will be phased following the Go-live date. Regular communication will be provided in the interim to ensure all stakeholders are fully aware of the changes and any action required of them in preparation.

WHAT ARE THE BENEFITS TO SUPPLIERS?

WHAT ARE THE BENEFITS TO BUYERS?
