

Collaboration is at the heart of everything that NEPO does

Our procurement solutions are the result of consultation with the public sector, suppliers and end users, so that we deliver positive outcomes for the communities we serve.

Our portfolio of over 80 solutions is available for use by any public sector body across the UK via our free associate membership scheme.

An expert partnership

Since 2017 NEPO has worked in partnership with The Procurement Partnership Limited (TPPL) to ensure that our fleet procurement solutions meet public sector needs.

Combining NEPO's procurement expertise with TPPL's fleet know-how, the partnership gives the public sector access to a wide range of key suppliers and competitive pricing, as well as the ability to tap into our combined market knowledge and procurement support.

"NEPO's fleet category has been developed in consultation with the public sector and suppliers.

We hold a regular fleet forum attended by public sector fleet managers to ensure that we tap into new and emerging fleet trends.

This approach has led to a range of innovations, such as the option to convert engines to electric and hydrogen technology, creating financial savings and supporting the sector's Net Zero ambitions."

Joanne Leask,
Procurement Manager at NEPO

OUR FLEET SOLUTIONS

New Solutions

Electric Vehicle Charging Infrastructure (Ref: NEPO232)

This solution covers the purchase of goods, installation and operation services of electric vehicle charging infrastructure on behalf of a public sector body under a call-off contractual arrangement.
